Ponieważ nieustannie ulepszamy ofertę standardowych produktów, ich specyfikacja może nieznacznie różnić się od pokazanej w katalogu.

Take a look at our comprehensive range, created by our own in-house design team and built by our experienced production teams.

Formulate

FORMULATE is a highly original concept, combining a unique mastery of the space using tubular structures and adding the infinite possibilities of printed fabrics for graphics. Aluminium tubes are used to create innovative shapes and structures that add value to your communications, these can be made to custom designs that meet your exact needs.

Modulate™

Modulate™ is the fusion of two original concepts, recognised for their success in the world of retail and exhibitions: Formulate, a range of tubular structures, and Vector modular frames.

Vector

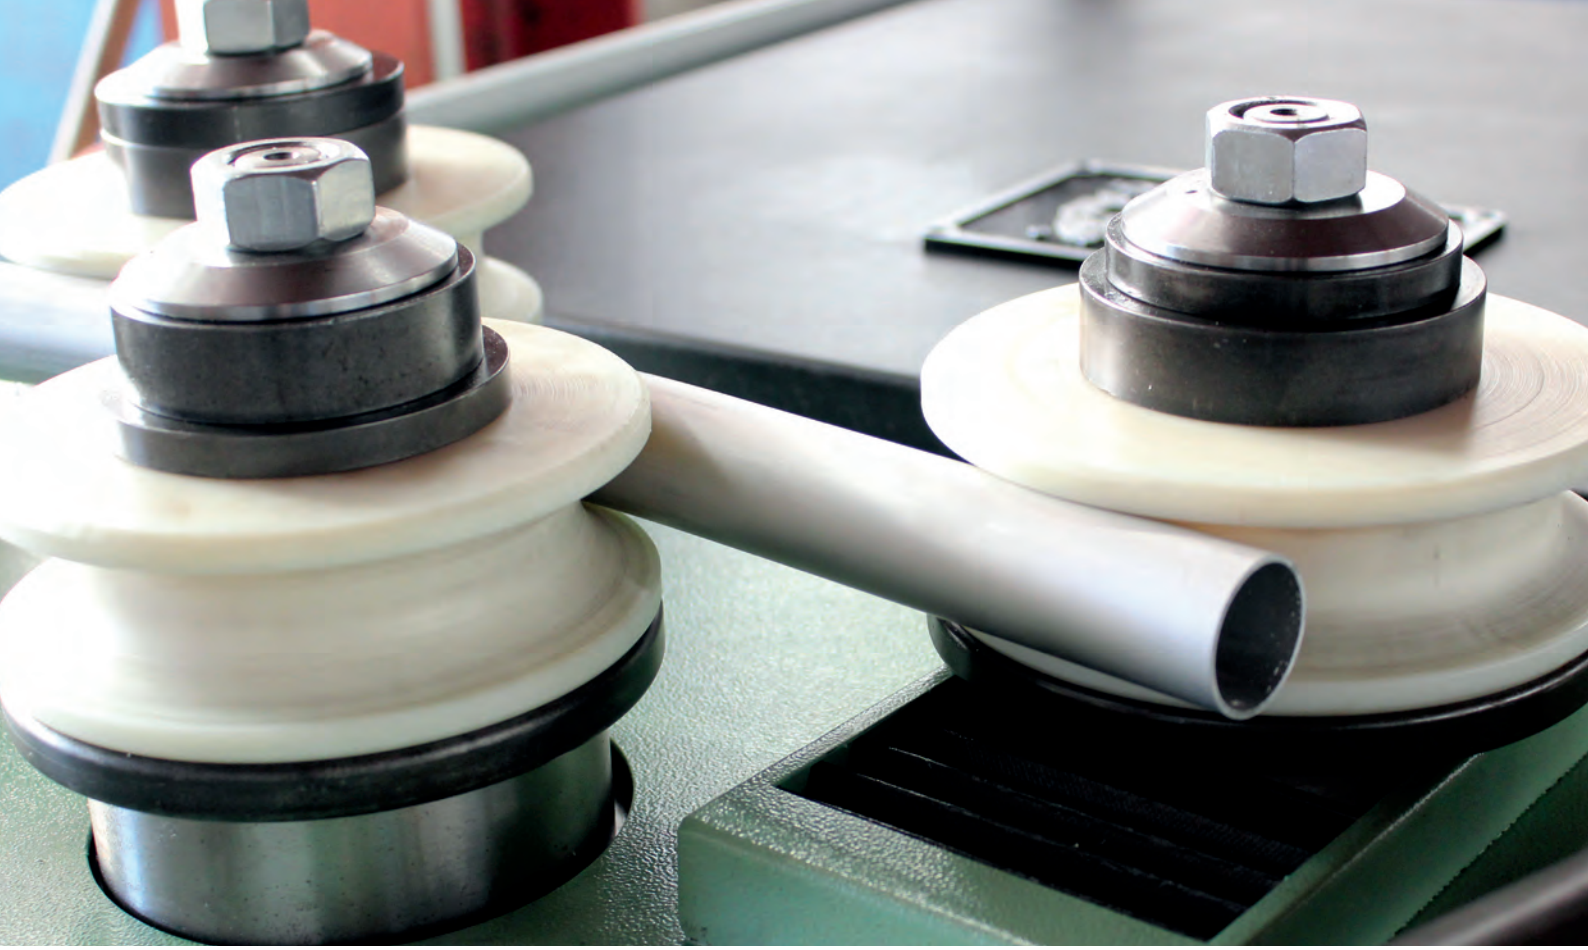
VECTOR is one of the most simple and versatile visual communication solutions on the market. It comprises an aluminium frame with a stretched textile or rigid graphic and can be adapted to any kind of location. There are many different styles, enabling all kinds of applications: wall-mounted, free-standing, double sided and with lighting.

Linear

LINEAR is an excellent choice for all Point-of-Sale communications and stands where you want to add value to flexible or rigid PVC graphics. You can choose between visible or hidden frames, depending on your requirements and preferences.

Arena

ARENA is an attractive tubular aluminium display structure which is both extremely lightweight and robust. Various sections can be assembled according to the space available and can then be covered with



Manufactured in Poland for a high quality end product

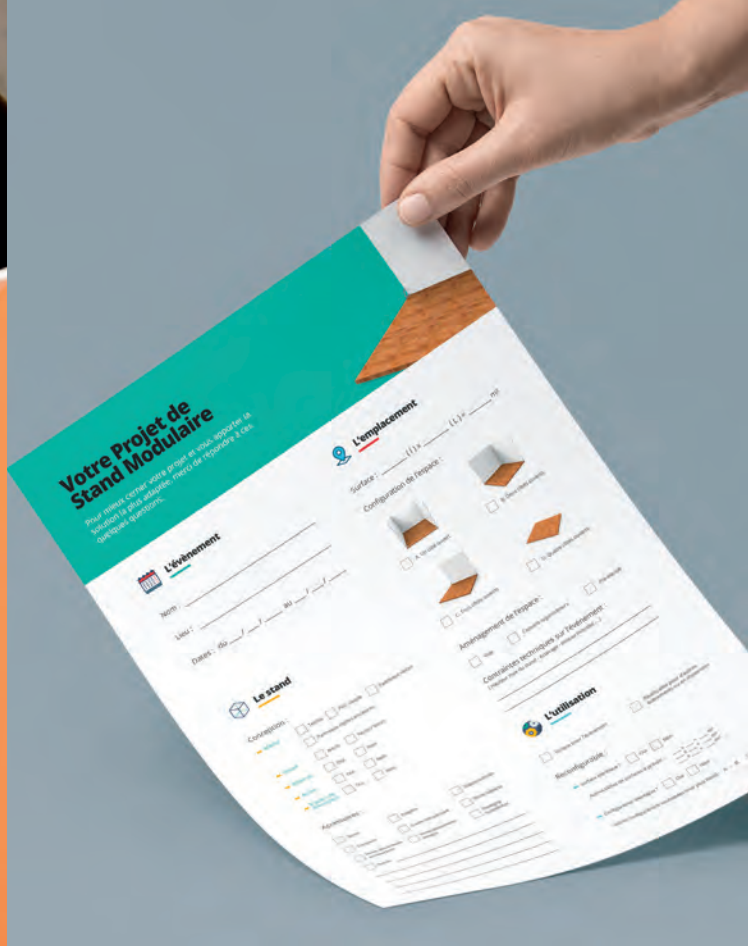
The creation of Vector, Linear, ModulateTM and Formulate modular displays requires design ingenuity and precision engineering. All stages of design and manufacturing are carried out locally by our own teams at our production facility. This proximity allows you to benefit from the expertise of a partner who manages your project entirely, from its concept to its delivery.

Large stock of aluminium profiles and tubes

Perfect vibrant print for all

With the latest printing innovations our large-format printers can create vibrant graphics that enhance branding communication to set you apart from the competition. To guarantee quality graphics that are adaptable for all uses, we have selected a wide choice of print media. The diversity of materials allows us to meet your requirements in the shortest possible time. Before shipping, all our graphics are completed by our highly skilled experts of our Finishing Team who control the quality and great finish of each and every order.

Standard and custom-made solutions



Advice and technical support

Wall frame, free-standing frame or exhibition stand, modular solutions offer you maximum visual impact and versatile designs that adapt to all types of environments.
With a wide range of standard and custom-made displays, you are sure to find the configuration that meets your needs and budget.
Our CAD department is at your disposal to guide you in the choice and design of the modular solution best suited to your project.
Our designers will advise you and offer fully customised and highly creative configurations.

Formulate

Our Formulate range provides limitless branding opportunities. Our comprehensive range of Point of Sale and event stands are also complemented with hanging frames to prominently display brands and events in 3D. By its very nature printing on fabric allows you to explore new possibilities in terms of both graphics and shapes. Graphic designs can be reproduced using dye sublimation processes, on stretchy material to allow a close fit to any shape, even the most unexpected ones! Installation is very simple and, because the displays are not very bulky, they are also very easy to transport.

Profiles of the 30mm and 50 mm diameter tubing - depending on your structure

A tool kit with bag, cotton gloves and 4 Allen Keys is added to Formulate custom-made constructions.

Original and innovative shapes that Yese centre stage

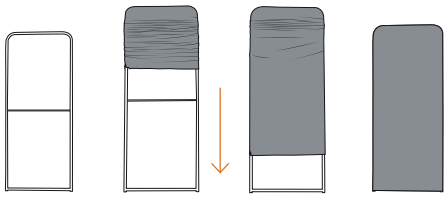
This simple and intuitive product is easy to construct in any environment. Formulate solutions are available in many configurations, including: totem poles, three to nine meter wide image walls, columns and arches; and they can also be made to measure.
The main purpose of Formulate is to give you a design solution that works where traditional wooden or aluminium angular structures have limitations.
The aluminium tubes can be moulded and folded, to suit your needs. With Formulate you can let your creativity run wild.

Assembly made simple

Formulate structures are made from 30 and 50 mm diameter anodised aluminium tubes. Like a child's construction set, each section has a clear numbering system to facilitate easy assembly. In addition to providing a solid structure, the various angled connectors of our Formulate system also allow you to create multiple configurations using different connector types and the angles they provide.

360° Visual Communications

Formulate is characterised by its fabric graphic with zip system. Therefore the display has no visible joins and is double-sided, optimising the impact of the message.



Simply slide the graphics over the frame to complete your product.

Assembly and stabilisation

The structures are adapted to to use them on various planes. They may be free-standing stands or walls, hanging structures or additions to other systems.

Stabilising feet

Metal hooks for hanging structures

Attach to an existing structure

Simple marking and coding system

The use of numbered stickers makes assembling the various systems very easy to follow, like a child's construction set.

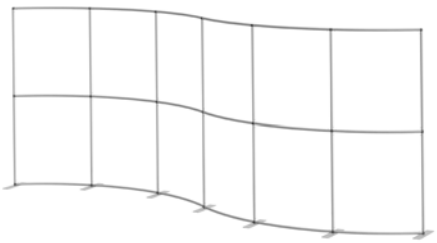
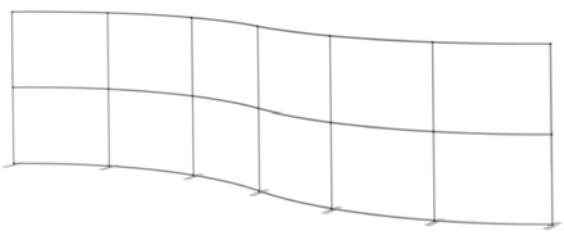
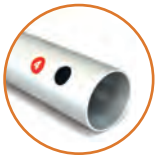
ø 30 mm tubes!



Ideal shape for dividing large spaces



Formulate Arches



Ø30 and 50mm aluminium tubing

Fast and easy assembly

Formulate arches are a great way to stand out. Their original and innovative shapes make them identifiable even from distance and can easily attract the attention of passers-by. Formulate arches perfectly combine the possibilities of tubular structures and the printed fabric graphics. They can optimise a space in an aesthetic way and create a visual effect that plunges the visitor into the universe of the advertiser.

Material:	Aluminim tubing Ø 30 mm
Graphic:	One-sided and double-sided zipped fabric graphic
Assembly:	Push-it button, Allen key
Manufacure:	To order

Maximise communication possibilities with two optional extra screens mounts

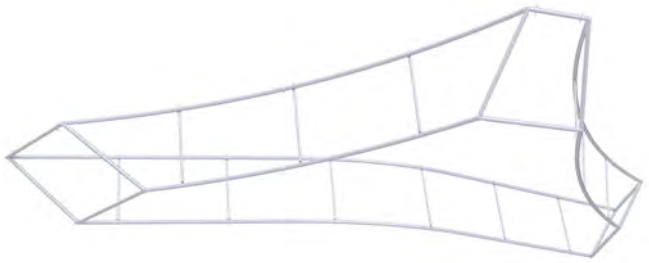
Hanging Structures

Formulate hanging structures have been specially designed for simple and safe installation.
The lightweight aluminium tubular structures make them ideal for dressing up an exhibition stand, shopping mall or indoor venue. The printed fabric graphic ensures optimum visibility.

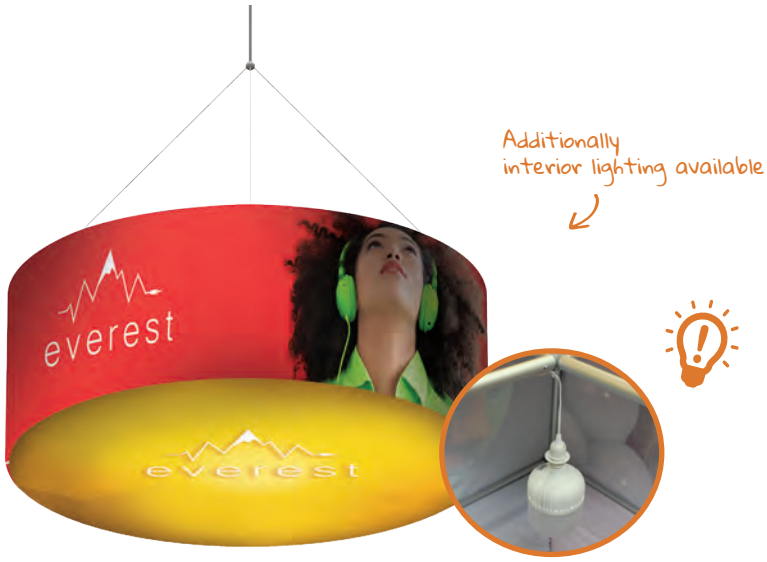


Material:	Aluminim tubing Ø 30 and 50 mm
Graphic:	Double-sided zipped fabric graphic
Assembly:	Push-it button, Allen key
Manufacure:	To order

Note: Hanging structures are sold without cables or other elements needed for the suspension of the structure.

Print finishing possibilities

Fabric graphics are printed by dye-sublimation, which ensures a high quality finish and amazing colours.



Additionally interior lighting available

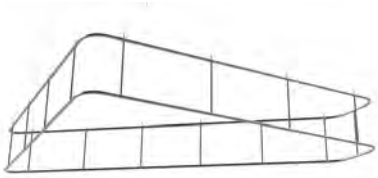
Easy to assamble

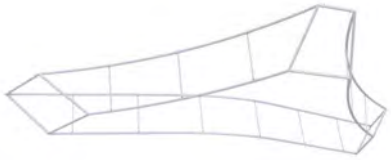
Add backlight to your hanging structure*

Ask our designer about adding lighting for hanging structure in different shapes.
Illuminated hanging structure will surely attract attention!

*Lighting cannot be added to standard lighting hanging structure.

Custom-made





Do you need several identical constructions? We will manufacture and deliver them with graphics!

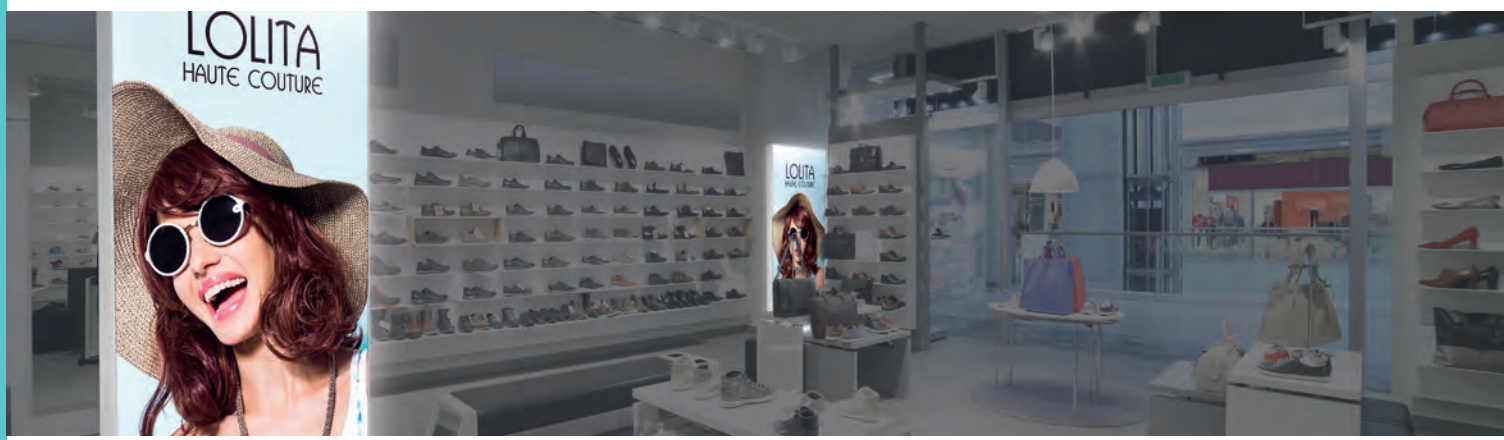
LED linkable lighting system

From this profile you can create free-standing LED frames, exhibition stand's backwalls and hanging structures

Profile available in different colours



LED

LED lights are considered by many as the future of the lighting industry. Profiles with LED lighting have been created for retail outlets and points of sale service. This kind of information transfer is a double success. On the one hand, it is constantly. It attracts attention, on the other hand it is extremely energy efficient.

Linkable LED lighting system

1

- Perfectly even lighting on large format frames without shadow
- Compatible with 75 mm and 125 mm Vector profiles
- Wall and free-standing use
- Simplified connectors for easy linking

2

Linkable LED lighting system 360 mm	LED-RTL-05
Linkable LED lighting system 960 mm	LED-RTL-05-960

Technical information

- **Length of module: 360 mm**
- Power of a module including 5 lenses: 13 W - 24 V voltage
- Luminous flux: 1040 lm - Light temperature: 6000/7000 K
- Round LED lens diameter 21mm, optimised thanks to its angle of beam of 13 x 39°
- Link up to five LEDs to one transformer
- Simple and quick assembly
- Estimated life: 50 000 hrs
- One year warranty

Length of module: 960 mm

- Power of a module including 18 lenses: 46 W - 24 V voltage
- Luminous flux: 3740 lm - Light temperature: 6000/7000 K
- Round LED lens diameter 21mm, optimised thanks to its angle of beam of 13 x 39°
- Link up to five LEDs to one transformer
- Simple and quick assembly
- Estimated life: 50 000 hrs
- Two yeara warranty

LED Backlit illumination

1

- Full-area illumination over the entire frame surface
- Compatible with 30 mm Vector profile.

Module A 300 x 300 mm	LED-RTL-30	moc: 7,2 W
Module B 300 x 100 mm	LED-RTL-31	moc: 2,4 W
Module C 100 x 100 mm	LED-RTL-32	moc: 1,2 W

Technical information

- Lighting is divided into modules in 3 sizes (A: 300 x 300 mm, B: 300 x 100 mm, C: 100 x 100 mm)
- Power lighting in modules:: A: 24V / 36 LEDs / 7.2 W; B: 24V / 12 LEDs / 2.4 W; 24V / 4 LEDs / 1.2 W
- Luminous flux: A: 795 lm; B: 264 lm; C: 88 lm
- The light temperature for each tile is 6500 K
- Estimated life: 50 000 hrs
- Each board has one cable to connect to another board
- Power Supply: 24V, 144W
- One year warranty

LED lightoboxes transformers

1

Transformer 24V 75W	LED-RTL-01
Transformer 24V 120W	LED-RTL-01-120

- Transformer for linkable and backlit lightingConnect up to 5 LED stripes in series
- Sleek design
- Integral fixing port for guiding the transformer inside the frame
- Cable system

Technical information

- Voltage: 24V
- Power: max 75W
- Input: AC 110/240V
- Output: DC 24V
- Supplied with fixing kit, cables and cable grommet

For Linkable LED lighting system

1

Transformer 144W	LED-RTL-33

- A power supply for LED panels located outside the frame
- Supplies the connected LED modules (max. 144 W)
- Cable system

Technical information

- Voltage: 24V
- Power: 144W
- Input: AC 110/240V
- Output: DC 24V
- Supplied with fixing kit, cables and cable grommet

For LED Backlit illumination

Vector Modules

Vector modules allow you to create many configurations from free-standing walls to extended exhibition stands. Simple to install frames with textile graphics are great message carriers. The possibility of combining individual elements in different configurations makes it possible to create a 15m2 stand from the same elements as 9m2! Additional accessories such as lamps, flyer pockets and TV holders will complete the whole thing.

You need a compact solution, which is easy to install and convenient in transport and storage?

Choose Vector modules!

- Aluminium profiles 50 mm
- 18 modules including backwalls, arches, LED panels, sotarges...
- Numbered elements with a length of 1250 mm for convenient transport and assembly
- Supplied with assembly instructions and graphics
- Profiles available from stock
- The modules are mounted with an Allen key, and the profiles are immediately adapted to the combination of modules with each other using the screws provided
- Reuse in the same or another configuration
- A good investment

NEW

Do you need a solution that you can assemble in the blink of an eye?

Choose a set of pre-assembled Vector modules!

- Aluminium profiles 50 mm
- Pre-assembled modules with a height of 2500 mm with graphics
- Delivered in a wooden carte (2 models available)
- The modules are prepared for connection by screws, which are included
- Because the modules are already assembled, you need less time for assembly of the entire stand

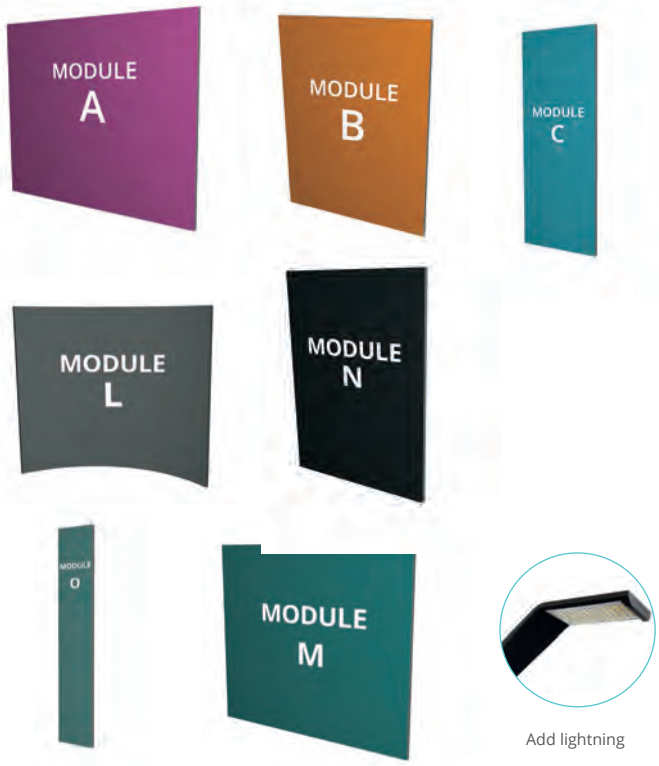
Go from a Stand 3 m² to a Stand 15m² in a blink of an eye!

Vector Modules

Backwalls Modules

- Backwalls between 1 and 3 m wide, which may be part of an exhibition stand or free-standing walls
- The backwalls are connected to each other by screws attached to order
- Module L will create an arched storage wall, giving an additional effect

Module A	MODULE-VFF-A	2500 (h) x 2950 (w) mm
Module B	MODULE-VFF-B	2500 (h) x 1950 (w) mm
Module C	MODULE-VFF-C	2500 (h) x 950 (w) mm
Module L	MODULE-VFF-L	2500 (h) x 2800 (w) mm
Module M	MODULE-VFF-M	2500 (h) x 2850 (w) mm
Module N	MODULE-VFF-N	2500 (h) x 1850 (w) mm
Module O	MODULE-VFF-O	2500 (h) x 450 (w) mm



Add lightning

LED Frames Modules

- Double-sided LED frame made of 125 mm profile
- Two stabilising feet
- FX295 included
- 12 LED strips and 3 transformers included
- In order to create an arch it is necessary to attach module C and two 950 mm beams

- Single-sided LED frame made of 75 mm profile
- 12 LED strips and 3 transformers included
- Vector to Vector fixings included

- Extend LED
- Double-sided LED frame made of 100 mm profile
- 8 LED strips and 2 transformers included
- Vector to Vector fixings included

- Double-sided LED frame made of 75 mm profile
- Two stabilising feet
- FX295 included
- 1 u.motion LED curtain and 1 transformer
- In order to create an arch it is necessary to attach module C and two 950 mm beams

- Single-sided LED frame made of 75 mm profile
- 1 u.motion LED curtain and 1 transformer
- Vector to Vector fixings included

Create a storage with LED wall

- Double-sided LED frame made of 100 mm profile
- 12 LED strips and 3 transformers
- included
- Vector to Vector fixings included

Module I	MODULE-VFF-I	2550 (h) x 950 (w) mm
Module J	MODULE-VFF-J	2500 (h) x 950 (w) mm

Pre-assembled Vector Modules

NEW

Packaged in compartment boxes, your modules are delivered assembled with your graphic.
Your stand is thus quick and easy to set up. A single creat can hold a stand of 6, 12 or even 18m².
Make your choice from a selection of 8 modules in order to ideally meet your needs.
The pre-mounted Vector modules are scalable, practical and fast solutions. It is the simplest and practical solution.

8 pre-assembled modules to choose from:

MODULE E

Crates for pre-assembled Modules

LED Hanging Structure

The illuminated LED hanging structure is a double eye-catcher. Hanging your message with a logo and distinguish your brand from the multitude of stands in the hall. Illuminated graphics with an interesting slogan will surely interest passers-by.

Material:	Double-sided aluminium 125 mm
Assembly:	Screw-in bracket, Allen key
Lightning:	Edge LED lightning
Manufacture:	To order

Assembly of sections by screw-in bracket

Cabling system

Edge LED lightning

Tool Kit included

Vector 125 mm LED Hanging Structure

Vector 125 mm LED Hanging Structure	VLBH125-PAN-250	1000 (h) x 2500 (w) x 125 (d) mm
Vector 125 mm LED Hanging Structure	VLBH125-PAN-350	1000 (h) x 3500 (w) x 125 (d) mm
Vector 125 mm LED Hanging Structure	VLBH125-PAN-500	1250 (h) x 5000 (w) x 125 (d) mm

Other sizes manufactured to order

Tension Banners & Backwalls Vector

The Vector modules can be used to create tension banners and backwalls.
Just add stabilizing feet to transform part of the exhibition stand into the free-standing frame.

Are you looking for a backwall or stand with dimensions other than Vector Modules? We will design and manufacture the frame you need.

Module C

Module C is great alternative to double-sided roll up. Perfect solution of promotions where message has to be change often.

Module I

Module I can be free-standing LED frame, that will do a great job at the reception desk or in the lobby.

2x Module A

Module A, which is 3 m long will be great to become a backwall. Combining two modules with each other you can provide a background for the conference or a photo backdrop.

Accent Hybrids Vector

The curves of Formulate combined with the Vector range create an original and innovative display solution. A multitude of custom-made configurations is possible, we offer standard shapes and sizes that are simple to incorporate with our Vector modules. Each Accent is ready-to-use and includes the necessary elements to adapt it to a module in the Vector range. Choose from one of six Accent Formulates to give depth to your free-standing projects or modular stands.

Material:	Aluminim tubing Ø 30 mm
Attachment to Vector:	Locks
Graphic:	Double-sided zipped fabric graphic
Assembly:	Push-it button, Allen key
Manufacture:	To order

Brand up both sides

Attached to frames by lock and Allen key

Fixing by metal or plastic clamp system

Graphic fabric with zip system

Modulate™

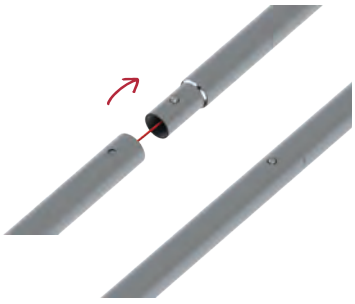
Modulate™ is the fusion of two original concepts, recognised for their success in the world of retail and exhibitions: Formulate, a range of tubular structures and Vector modular frames.

Attract attention

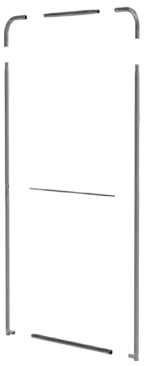
Modulate™ consists of a set of frames made from aluminium tubes covered with a printed tension fabric graphic. These frames can be connected together using powerful magnets inside each element.
Based on this simple magnetic principle, the different Modulate™ frames combine to create the perfect configuration for every venue: retail outlets, trade shows, shell schemes, exhibition venues, shopping centre, or in office environments as simple partitioning for meeting areas.

Intuitive assembly with no need for tools

Assembling Modulate™ structures does not require no tools. Each section is labelled by number and colour coded for ease of assembly, connecting with a push-button.
Once the structure is assembled, the Twist & Lock feet can be locked into place by rotating a quarter of a turn, for a perfectly stable free-standing frame. Add the perfect finishing touch with a tension fabric graphic, designed to fit the frame perfectly.



Assemble the bungee sections using the push-buttons

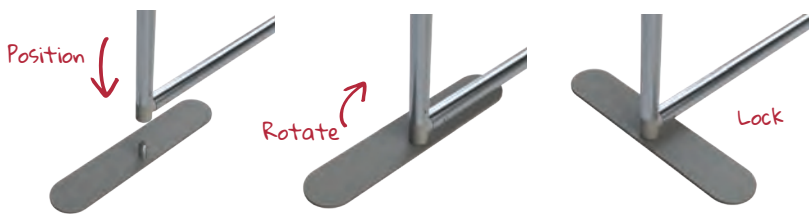


Add the central reinforcement tube and connect all the tubes according to the numbered system

Place the Twist & Lock foot under the structure and rotate to lock it

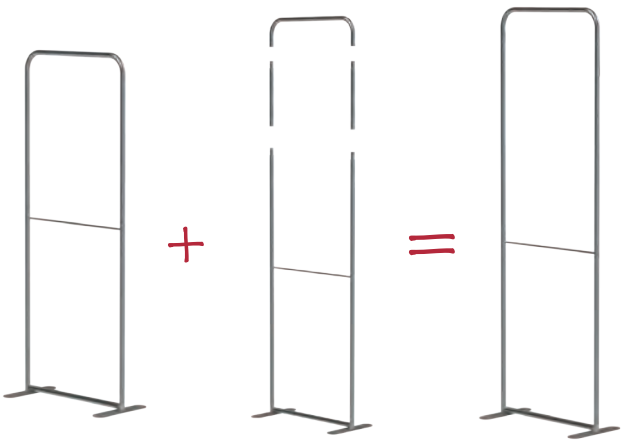
Use the gloves provided to handle the graphic and slide it onto the frame

How to install Twist & Lock feet ?



Scalable structures

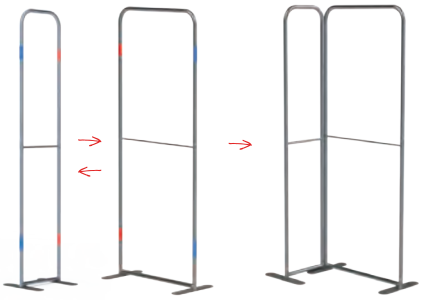
To add greater versatility to your Modulate™ structures, you can add a 400 mm tubular extension, allowing you to change the height of your frame from 2000 mm to 2400 mm. Easily inserted between two sections, this extension allows you to use the same frame at two different heights.



PATENT

MagLink connectors: simple, fast and reconfigurable

Get original by combining the different sizes and shapes of Modulate™ frames. Thanks to the exclusive MagLink magnetic system built into the structure, you can connect the frames by simply touching them together



360° MagLink connector in each pole

Optional 400 mm extension to change the height of the structure

Self-locking system with bungee poles and push-buttons

Simple assembly with numbered frame parts

Central reinforcement tube (18 mm diameter)

2 stabilising feet with Twist & Lock supplied with each frame

Double-sided tension fabric. Zip system

Modulate™ carry bag with dedicated compartments for the feet and graphics

Seria Modulate™

Modulate™ includes aluminium tubular frames (Ø30 mm) that can be used with double-sided printed textile graphics. These modules can be used by themselves or combined to create hundreds of possible configurations. The different structures are classified according to their width or shape. The colour of the module corresponds to the coding system on the structure. Each frame is supplied with a Modulate™ carry bag with dedicated slots for feet and graphics.

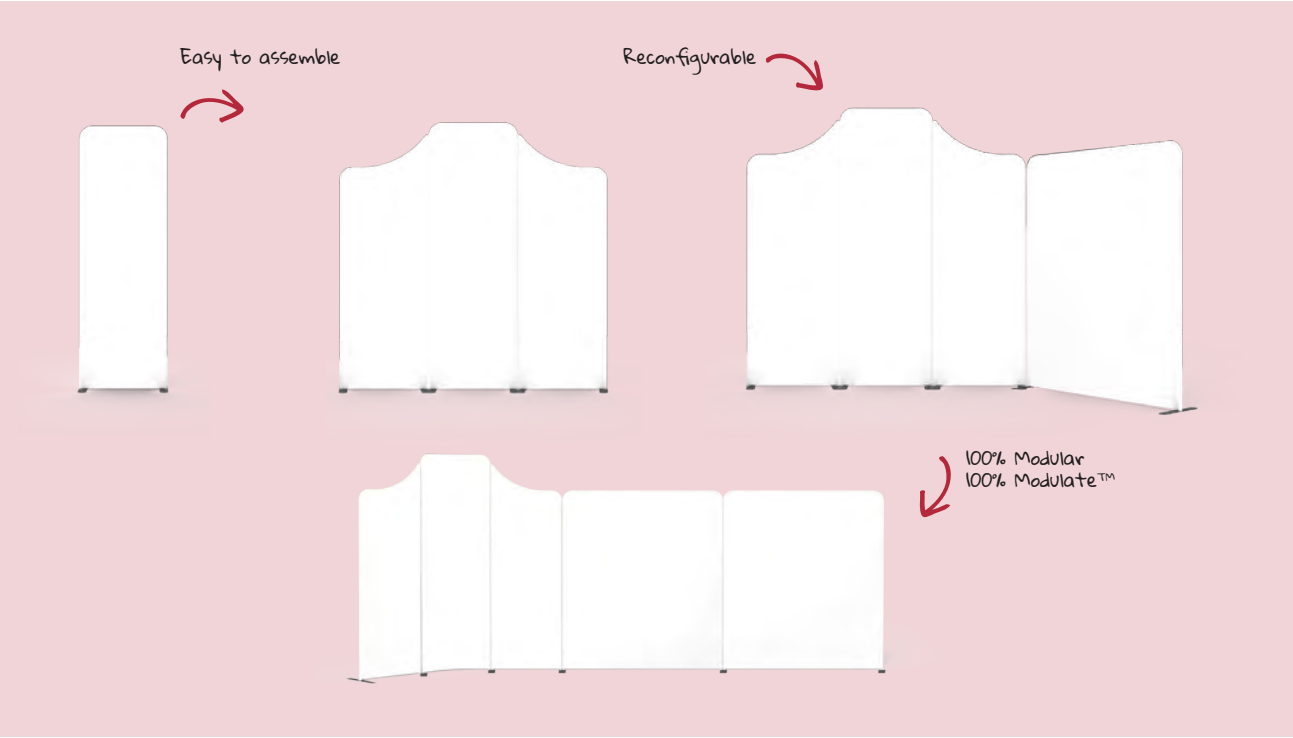
Mix & Match Modulate™

Modulate™ offers innovative layout solutions and maximises the impact of your message with sublimation printed textile graphics.
Choose your Modulate™ frames from the shapes and sizes and on offer and connect them magnetically at any angle using the exclusive MagLink system.
You can mix and match to create new configurations or change them to suit your needs.
Switching from a simple wall of images to an exhibition stand takes just a few minutes!

Change simple backwalls into the stand in few minutes



Retail Solutions

The versatility and variety of Modulate™ frames make them ideal choice for decorating interior spaces. The same frames can be arranged in different ways to redesign your POS advertising.

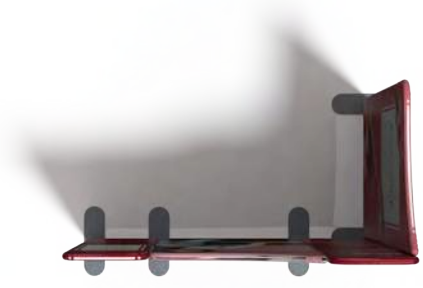


Image walls for events

The use of large-format graphics is particularly suited to the world of events and promotions.

Half feet are also available, allowing you to install Modulate™ structures in front of a wall.

Reconfigurable exhibition stands

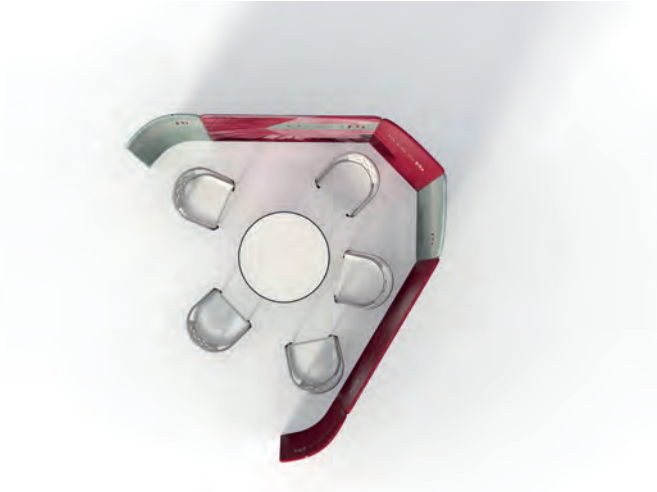
Easy to transport and assemble, Modulate™ frames can be used to create a stand.
Modulate™ offers the freedom to redesign your stand as many times as you want, guaranteeing an excellent return on your investment.

Brighten up your Modulate™ frames with clamp-on LED spotlights (optional)

Ideal for creating shell schemes stands

Creating workspaces

Creating simple private reception spaces, partitions or office spaces with the Modulate™ frames. The large customisable surfaces can also be used for decoration as well as brand communication.



Create effortless partitions

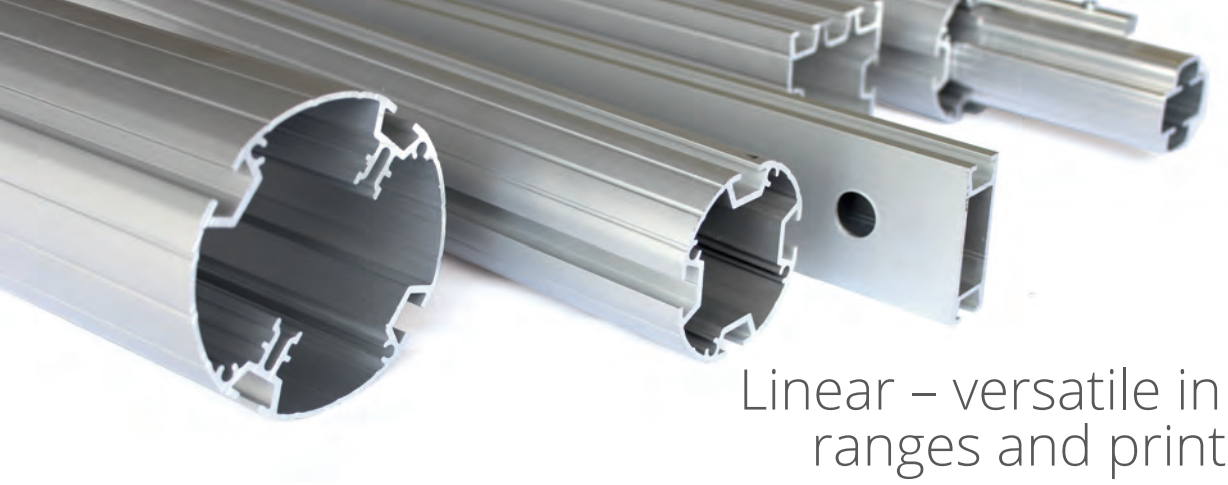
Linear

The Linear range is perfect for applications such as image walls, stands and office layouts. It comprises aluminium frames used to provide the basis of a durable and solid structure, which can be used on a permanent or temporary bases.
You can take full advantage of this range in its many different forms by combining it with our Vector range to create secure storage spaces.



A wide range of profile shapes

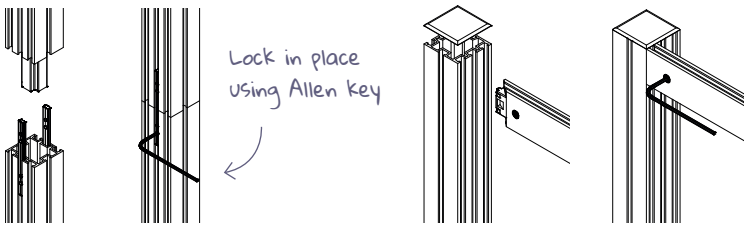
Linear – versatile in profile ranges and print media

Linear is a modular solution made up of several aluminium frames. It has been designed to offer an alternative to frames with fabric graphics. Its construction is based on channelled posts and strengthening cross-beams and it therefore allows you to add flexible printed PVC graphics or rigid printed panels to your structures.

// Assembling Linear

Linear frames can be slotted in thanks to a system of connectors, an integral part of the frame. At its most basic, all that is needed is one male pole and one female pole.

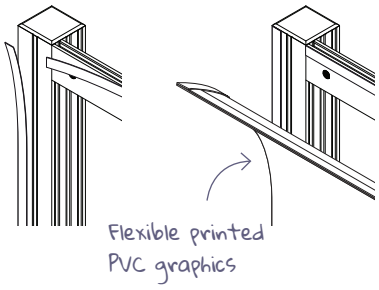
Assembly of a pole and a cross-beam using an Allen key to lock in place.



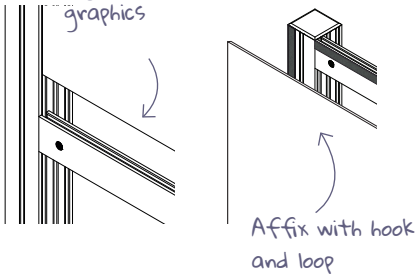
// Options for frame covering

Whatever materials you intend to use, you can choose to cover the frame either fully or partially.

A If you choose a flexible PVC graphic, an adhesive magnetic tape needs to be fixed to the back of the visual. A metal tape is bonded to the frame for the magnetic tape to fix to.

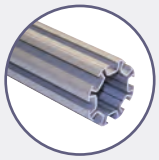


B If you choose a cover made of rigid panels (5mm), you can insert each panel in the channel. If you intend to cover the whole structure, hook and loop can be fitted to the back and on to the frame.



// Anodised aluminium posts and beams with channel profiles

LN601 - 50mm round post - four connections



LN618 - 50mm round post - eight connections

LN602 - 75mm round post - four connections

LN8W - 75mm round post - eight connections

Arena

If your visual communications project is about handling space and layout, the organisation of an event or communications activity, we have the solution: the solution is ARENA.

The Arena framework is a visually attractive structure made up of aluminium tubes. It is a modular solution which is extremely stable and highly scalable. The various sections can be assembled, re-configured and re-used according to the requirements of each event.

Arena Structures

The 25mm aluminium tubes of the ARENA modular solution can be assembled and fixed together to create sections of various shapes and sizes in order to build the foundations of an imposing and solid stand structure.

A wide selection of tubular sections can be supplied to create a bespoke solution that meets your exact requirements.

Assembling Arena

Components are supplied including nine straight sections, to create the structure you need, based on the type of transportation you select.

System available on request.

Simple assembly

The various sections can be put together using the screws and nuts supplied; so no additional tools are required for the assembly. The graphics (PVC or textile) are then secured using eyelets and bungee cords. Maximum visibility can be achieved by using six metre long spans that do not require any reinforcement.
Tip: this also can be used as lighting structures.

Accesories

Whether you are finishing an exhibition stand, a point of sale or a specific event, our modular solutions can be enhanced by a large selection of accessories such as counters, document stands and lighting solutions.

We also have a range of appropriate transportation solutions (bags and cases in hard and soft materials) to suit your requirements.

Accessories
Literature holders

Displaying your documentation in a prominent, eye-catching way so that stand visitors will pick it up and take it away is an absolute must for communications professionals.
Our literature holders, available in a vast choice of materials and finishes to be used in all kinds of environments, are the ideal complement to your modular stand solution.
